Atlantic Canada Aerospace and Defence Association Capabilities Directory

Who We Are

The Atlantic Canada Aerospace and Defence Association (ACADA) is a collaborative SME-focused organization representing the interests of the aerospace, defence and security industries in Atlantic Canada. ACADA is comprised of 170+ industry members and organizations across Atlantic Canada.

Our goal is to grow the aerospace, defence and security sectors in Atlantic Canada. We do this by assisting members in 6 key areas: advocacy, marketing and promotion, business development and supply chain engagement, member development, innovation and commercialization, as well as workforce development and career promotion.

ACADA works collaboratively with industry members, provincial and federal government agencies, and other key stakeholders to facilitate strategic industry development on behalf of the region while promoting the Atlantic Canada brand locally, nationally, and internationally.

ACADA members are delivering products and services to the global marketplace in land, marine, and air/space domains for both commercial and defence applications.

President and CEO
Mr. Richard Billard
